**Subject:** Canby Geothermal Project

Good morning George,

In our meeting last July 18 there, David mentioned that a letter was forthcoming on the issue of an aquifer exemption (whether required or not) for the Canby geothermal project. To recall, the operator in this project just wants to extract energy out of the geothermal fluids and inject these back to the zone without any additional inputs. Kindly advise re the status of this issue. The operator has been following-up and we would like to inform him of his options going forward. Thanks.

Jerry
